

Connecticut Cannabis Law: Timeline and Influence Map

The source-backed research dataset behind the public website

What changed in Connecticut cannabis law, when it changed, who proposed it, who supported and opposed it, which agency implemented it, and what the public record does and does not show about influence. Built from the enacted acts, the legislative record, the testimony files, the lobbying and contribution filings and the state registers. The data was built first; this report describes it.

THE DATASET	ROWS	THE DATASET	ROWS
Sources in the ledger	25	Testimony records	683
Discrete legal changes	399	People and entities	1,105
Statutory sections touched	107	Influence events	1,035
Bills in scope	15	Regulations and policies	33
Bill history actions	383	Timeline events	616
Amendments filed	209	Claims reviewed	411
Roll call votes	63	Open gaps	12

The rule that governs every statutory fact in this report

Everything statutory here is built from the ENACTED PUBLIC ACTS. Nothing is taken from the General Assembly's published chapter pages.

On the day this dataset was built, the published chapter 420h page still printed CGS 21a-420u(f) in full and never mentioned P.A. 25-101, which repealed it effective 1 January 2026. The published revision lags the session. An earlier piece of work in this project read that page and reached a wrong conclusion because of it. Source tier 3 in the ledger marks every source known to lag, and nothing in tier 3 is relied on for current law.

Built 29 September 2026 by Josiah Schlee for the CT Cannabis Record Package. Every records request in this report is drafted and not sent. Nothing has been sent to the Department of Consumer Protection, the Social Equity Council, the General Assembly, any company or any reporter.

What travels with this report

CT_CANNABIS_LAW_TIMELINE_MASTER.xlsx — one sheet per dataset plus the schema.

data/ — twenty-one CSV exports, one per dataset, with stable IDs.

web/ — the six JSON files the static site reads: timeline, statute_changes, influence_graph, bill_network, issue_pages and source_index, plus a build manifest.

NETLIFY_BUILD_BRIEF.md — the site information architecture: thirteen pages, their data contracts, components, filters, visualizations and the build-time assertions that must fail the build.

1. Executive summary

Eight findings from the dataset. None of them asserts that anyone improperly influenced anything, and the reason is in section 6.

1. Connecticut cannabis law changed in 399 discrete enacted sections between 2021 and 2026, across the eight acts whose enacted text is held locally. Each is one row with its act, section, effective date, statutory citation, action, policy category, affected population, the text the act deleted and the text as enacted. 125 of them carry the deleted old rule; the rest are sections where the act prints none.

2. Four of those sections repeal a rule outright, and three of the four are the twenty-mile separation rules. P.A. 25-101 sections 15, 16 and 17, signed 24 June 2025 and effective 1 January 2026, repeal CGS 21a-420j(e), 21a-420m(f) and 21a-420u(f). Connecticut effects a repeal like this by re-enacting the section with the subsection struck and the rest redesignated, so no structural parse can see it. Those three rows are flagged by hand from the supersession audit against the enacted acts, and the statute pages carry a permanent repeal banner for that reason.

3. 327 of the 399 changes take effect later than the day the act was signed. The gap between signing and effect is where most of the confusion in this subject lives, and every row carries both dates so a reader can see it.

4. 15 bills are in scope, 12 of them enacted, with 383 dated actions between them. The record also holds 209 amendments, of which 149 were filed and never called. An uncalled amendment is the clearest evidence in the whole legislative record of what someone asked for and did not get, so they are kept and shown.

5. 683 written testimony records were filed across 14 cannabis bills in six sessions. 339 state a position of Opposes and 124 state Supports; 220 do not state one in the committee's filename convention and are recorded as such rather than guessed. 67 files the index lists could not be retrieved and are recorded as NOT RETRIEVED, never omitted.

6. Who drafted any particular amendment is unknown for almost every amendment in this dataset. Bill status records give introducers, committees and LCO numbers. They never give a drafting requester. Where language first appears in a substitute, the earliest source found is named and authorship is left as unknown. That is a limit of the public record, and it is listed as GAP_0003.

7. 1,035 influence events are recorded, and not one of them asserts influence. 797 rate 4 on the evidence scale, 41 rate 3 and 197 rate 2. The scale rates the EVIDENCE, never the influence: a 4 means a filing or a dated record exists, not that anyone caused an outcome. Every row carries an alternative explanation and an explicit statement that it records visibility, not causation.

8. Of 411 claims reviewed, 262 are ready to publish now, 147 need one more record, 1 is background only and 1 must not be published at all. The last two are the important ones, and section 11 sets out the safer wording for each.

The finding underneath all of this

Connecticut publishes an unusually complete legislative record: every bill action, every amendment including the ones never voted, every roll call, and thousands of pages of testimony. What it does not publish is the connective tissue: who asked for a piece of language, which establishment a registered backer backs, what percentage anyone owns, and what any operating agreement says. The legislative process is visible. The decisions inside it are not.

2. Method, and the rule that governs every statutory fact here

Five passes, in order. The structure was built before the research was complete, so that every new record had somewhere to go.

PASS	WHAT IT DID	WHAT IT PRODUCED
1. Source ledger	Catalogued every act, register, filing and derived analysis already held, with custodian, type, URL, date, reliability tier and what each cannot show.	sources.csv, 25 rows
2. Act parsing	Split every enacted act into sections, kept the cannabis-scope ones, read the effective date, the action taken, the statutes cited and the bracketed text the act deletes.	legal_changes.csv, 399 rows; statutes.csv, 107 rows
3. Bill status	Fetches the CGA bill status page for every bill in scope and parsed the introducer, the dated history, called and uncalled amendments with LCO numbers, roll calls, fiscal notes and bill analyses.	bills.csv 15; bill_lineage.csv 383; amendments.csv 209; votes.csv 63
4. Testimony sweep	Read the committee testimony index for every bill and recorded speaker, organization and position as filed, including the files that could not be retrieved.	testimony.csv, 683 rows
5. Influence normalization	Carried the lobbying registrations, campaign contributions, events and access records and the language provenance work into one typed table with an evidence strength and an alternative explanation on every row.	influence_events.csv 1035; people_entities.csv 1105

Source reliability. Three tiers. Tier 1 is primary: enacted law, the official legislative record, an agency filing or a state register. Tier 2 is derived inside this project from tier 1, with every row carrying its own source. Tier 3 is secondary and known to lag, and nothing in tier 3 is relied on for current law.

TIER	SOURCES	EXAMPLE
Tier 1	20	June Sp. Sess. P.A. 21-1 (SB1201) — Responsible and Equitable Regulation of Adult-Use Cannabis Act (RERACA)
Tier 2	4	Joint Favorable Reports, General Law Committee
Tier 3	1	CGS chapters 420f and 420h as published by the General Assembly

How uncertainty is carried. Five statuses, used consistently: verified, supported inference, open question, conflict, and do not say. A row never gets a stronger status because the stronger one would read better. Where a bill in the fetch sweep turned out not to be a cannabis bill it went to out_of_scope.csv with the reason, rather than being silently dropped — 3 of them.

Dates. ISO throughout. Where an act says "from passage" the effective date is the signing date and the original words are kept beside it in effective_text, because "from passage" and a stated date are different facts.

Names. Kept exactly as they appear in the source record. Aliases are stored in a separate field. A witness filing as "Zachs, Ben, COO" and a filing as "Benjamin Zachs" are the same person, and the dataset records both spellings rather than choosing one.

Categories are kept apart on purpose

Medical cannabis, adult-use cannabis, hemp, infused beverages and laboratory testing are governed by different instruments with different effective dates, and collapsing them is the commonest error in writing about this subject. Every legal change carries its own policy categories, a section can carry several, and the medical and adult-use markets are never merged in any count in this dataset.

3. The source ledger

25 sources. Every other dataset points at this one by source_id.

The ledger records what each source gives and, as importantly, what it cannot give. The second column is where most of the analytical discipline in this project lives: a register that has no field for something cannot be used to prove that thing, however convenient it would be.

ID	SOURCE	TYPE	TIER
SOURCE_0001	June Sp. Sess. P.A. 21-1 (SB1201) — Responsible and Equitable Regulation of Adult-Use Cannabis Act (RERACA)	enacted public act	1

The full ledger with URLs, retrieval dates, citations and the limits of each source is appendix A.

Source types this project flagged as missing and has not obtained

Committee agendas and minutes; LCO amendment drafting requests; the vote tally sheets behind each joint favorable report; emergency regulations; the version history of the agency Policies and Procedures; lottery award records as distinct from entry records; and officials’ calendars. Each is a numbered gap in section 10 with the exact record named.

4. The law-change timeline

One row per discrete change, not one row per bill. 399 rows.

PUBLIC ACT	BILL	SIGNED	SECTIONS IN SCOPE	ENACTED TEXT HELD
P.A. 12-55	HB5389	2012-05-31	0	no
P.A. 16-23	HB5450	2016-05-17	0	no
June Sp. Sess. P.A. 21-1	SB1201	2021-06-22	140	yes
P.A. 22-103	HB5329	2022-05-24	20	yes
P.A. 23-79	HB6699	2023-06-26	0	no
P.A. 23-97	SB0009	2023-06-28	0	no
P.A. 24-76	HB5150	2024-05-30	33	yes
P.A. 25-101	HB6855	2025-06-24	20	yes
P.A. 25-166	HB7181	2025-06-30	42	yes
P.A. 25-168	HB7287	2025-06-30	20	yes
P.A. 26-8	HB5350	2026-05-20	111	yes
P.A. 26-100	HB5222	2026-06-02	13	yes

P.A. 23-79 is the exception and it matters. It is the act that added the three twenty-mile rules and created the Office of the Cannabis Ombudsman, and it is the one cannabis act whose enacted text is not held locally. Its sections are recorded from the bill status page and the statutory matrix rather than parsed, and that is logged as GAP_0001. No count of parsed sections in this report includes it.

By policy category. A section can carry several, because one section often does several things.

POLICY CATEGORY	CHANGES	ACTS TOUCHING IT
licensing	233	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
enforcement and penalties	218	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
ownership and control	145	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
advertising and packaging	117	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
medical patients and caregivers	112	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
testing and laboratories	104	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
agency duties and rulemaking	86	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
home grow and possession	85	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8

taxation and revenue	40	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 24-76; P.A. 25-101; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
data and reporting	33	June Sp. Sess. P.A. 21-1; P.A. 22-103; P.A. 25-166; P.A. 25-168; P.A. 26-100; P.A. 26-8
ombudsman	1	P.A. 26-8

The four repeals. Three of them are the twenty-mile rules.

ACT	SECTION	STATUTE	WHAT WAS REPEALED	EFFECTIVE
P.A. 25-101	Sec. 15	21a-420j; 21a-420e	REPEALS the cultivator twenty-mile rule, former CGS 21a-420j(e). Effected by re-enacting the section with the subsection struck and the rest redesignated.	2026-01-01
P.A. 25-101	Sec. 16	21a-420m; 21a-420l	REPEALS the producer twenty-mile rule, former CGS 21a-420m(f).	2026-01-01
P.A. 25-101	Sec. 17	21a-420u; 21a-420t; 21a-420e	REPEALS the hybrid-retailer twenty-mile rule, former CGS 21a-420u(f). The act brackets the subsection out entirely and redesignates (g), (h) and (i) as (f), (g) and (h).	2026-01-01
P.A. 25-166	Sec. 45	21a-418	REPEALED outright	2025-10-01

5. Bill and amendment lineage

How a bill became law, what was proposed along the way, and what was refused.

BILL	YEAR	INTRODUCED BY	ACT	ACTIONS	AMDS	CALLED	VOTES
HB5389	2012	Judiciary Committee	P.A. 12-55	41	59	10	9
HB5450	2016	Public Health Committee	P.A. 16-23	39	30	12	6
HB6377	2021	Labor and Public Employees Committee	not enacted	14	0	0	0
SB1201	2021	Sen. Martin M. Looney, 11th Dist. Rep. Matthew Ritter, 1st Dist.	June Sp. Sess. P.A. 21-1	24	9	7	9
HB5329	2022	General Law Committee	P.A. 22-103	22	2	1	2
HB6698	2023	General Law Committee	not enacted	15	0	0	0
HB6699	2023	General Law Committee	P.A. 23-79	23	5	3	4
SB0009	2023	Public Health Committee	P.A. 23-97	40	10	4	3
HB5150	2024	General Law Committee	P.A. 24-76	27	11	1	2
HB6855	2025	General Law Committee	P.A. 25-101	22	1	1	2
HB7181	2025	General Law Committee	P.A. 25-166	36	1	1	2
HB7287	2025	Rep. Matthew Ritter, 1st Dist. Sen. Martin M. Looney, 11th Dist. Rep. Jason Rojas, 9th Dist. Sen. Bob Duff, 25th Dist.	P.A. 25-168	24	59	12	14
HB5222	2026	General Law Committee	P.A. 26-100	27	2	1	2
HB5242	2026	Public Health Committee	not enacted	2	0	0	0
HB5350	2026	General Law Committee	P.A. 26-8	27	20	7	8

Every cannabis act in this dataset was raised by a committee, not by a named member. Eleven of the fifteen bills were introduced by the General Law Committee, the Judiciary Committee or the Public Health Committee. A committee-raised bill has no individual author on the face of the record, which is the first reason authorship of language is unknown throughout this dataset.

The uncalled amendments. 149 amendments were filed and never voted on. They are the record of what was asked for and refused, and they are the most under-used part of the Connecticut legislative record.

BILL	UNCALLED AMENDMENTS FILED	CALLED	WHAT THIS SHOWS
HB5389	49	10	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
HB7287	47	12	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
HB5450	18	12	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
HB5350	13	7	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
HB5150	10	1	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
SB0009	6	4	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
SB1201	2	7	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.
HB6699	2	3	Each uncalled amendment is a filed, numbered request that never reached a vote. The LCO number identifies it; the record does not say who asked for it.

What the bill record gives, and what it does not

It gives: the introducing committee, every dated action from referral to signature, the file numbers that date each fiscal note and bill analysis, every amendment with its LCO number and whether it was called, every roll call, and whether public hearing testimony exists.

It does not give: who requested an amendment, who drafted a substitute, what was said in a committee working session, or why an amendment was never called. Those are GAP_0002 and GAP_0003, and until they are obtained, authorship of language in this dataset is recorded as unknown with the earliest source named.

6. People, entities and influence evidence

1,105 actors and 1,035 influence events. The section explains why none of it asserts influence.

Influence is carried here as an evidentiary category. Every event has an actor, a target, an action, the provision affected, an evidence type, a strength from 0 to 5, a source, an exact locator, an alternative explanation, and a field that reads: this row records visibility, not causation. That last field is not decoration. It is the difference between a dataset a subject can answer and one they can sue over.

STRENGTH	MEANING	EVENTS IN THIS DATASET
5	direct documentary link	0
4	strong temporal or documentary support	797
3	plausible supported inference	41
2	weak lead	197
1	background only	0
0	do not use	0

The scale rates the strength of the EVIDENCE that the actor did the thing recorded. It never rates whether the action affected an outcome. Nothing in this dataset reaches strength 5, because a 5 requires a document directly linking an actor to a drafting or decision act, and no such document is in the public record examined.

EVIDENCE TYPE	EVENTS	WHAT IT ESTABLISHES	WHAT IT DOES NOT
testimony	463	That a named person or organization filed a written position on a named bill.	Anything about the outcome. Testifying is participation in a public process.
campaign contribution	415	That a lawful, disclosed contribution was made on a date to a named committee.	Any connection to any decision. Sequence is not causation and no improper influence is asserted.
lobbying registration	78	That a client registered to lobby and declared issues.	What was asked for, of whom, or whether it worked.
meeting or event record	41	That an event happened, who hosted it and who was listed.	Who attended, what was said, or any effect.
bill or amendment language	24	That specific language appeared in a named instrument on a date.	Who drafted it. Authorship is unknown for almost every amendment here.
public statement or event	14	That a statement or event is on the public record.	Any effect on a decision.

Testimony positions. Of the 683 testimony records, 339 state Opposes and 124 state Supports. The committee filename convention is the source of the position, and where it does not state one the row says so.

BILL	TESTIMONY FILED	OPPOSES	SUPPORTS	POSITION NOT IN THE FILENAME
2024 HB-05150	159	97	22	40
2026 HB-05222	135	132	1	2
2026 HB-05350	98	58	10	30
2022 HB-05329	51	6	4	41
2025 SB-00970	48	2	40	6
2025 HB-07178	44	9	15	20
2021 HB-06377	41	0	0	41
2023 HB-06699	29	5	9	15
2026 SB-00231	25	16	2	7
2024 HB-05235	14	5	5	4

The four things this dataset refuses to do

It does not treat a donation, an award, an employment history or a piece of testimony as proof of improper influence. Each is lawful, disclosed and ordinary, and each is recorded as visibility.

It does not infer authorship from proximity. Language appearing in a substitute after a witness asked for something similar is a documented sequence, not a finding, and it is labelled as one.

It does not resolve an identity on a name match. Contribution rows carry an identity confidence field, because two people share a name more often than an investigation would like.

It does not publish a causal claim that the record cannot carry. Two such claims are in section 11 with the wording that can be published instead.

7. Agency implementation: regulation or policy

The distinction that decides what survives a challenge.

A regulation adopted under chapter 54 goes through notice, comment, Attorney General review and the Legislative Regulation Review Committee. A policies and procedures document does not. Both can tell a licensee what to do. Only one of them is law, and Connecticut's adult-use market runs substantially on the other.

TRACKING	AGENCY	SUBJECT	STATUS	OUTCOME

Four rulemakings on equity joint venture ownership and control were withdrawn permanently

PR2026-041, PR2026-043 and PR2025-027 are recorded as Agency Withdrawn Permanently, and PR2026-045 and PR2026-040 sit at Prepare For Comment Period. A withdrawn rulemaking is part of the implementation record: it establishes that a rule on this subject was attempted and abandoned. Why each was withdrawn is not in the published tracking record and is listed as an open question rather than characterised.

The policy-not-regulation finding. Adult-use requirements, including the testing requirements, are carried by a Department Policies and Procedures document rather than by regulations adopted under chapter 54. The document is in effect as the agency's stated position. It was never converted into adopted regulations for the adult-use market. The version history and the authority cited for each change are not published, which is GAP_0009.

8. Issues

Fourteen issue pages, each with its own changes, acts, statutes and gaps.

ISSUE	CHANGES	ACTS	OPEN GAPS	WHAT THE PAGE ANSWERS
Licensing and lotteries	233	8	7	How a licence is obtained: lotteries, conversions, ventures and the caps around them.
Enforcement and penalties	218	8	0	Inspections, suspensions, fines and criminal provisions.
Ownership and control	145	8	3	Who owns and controls a cannabis establishment, and what the state publishes about it.
Advertising, packaging and labelling	117	8	0	What may be said and how products must be packaged and labelled.
Medical patients and caregivers	112	8	0	The palliative use program, patient rights, caregivers and dispensary staffing.
Testing and laboratories	104	8	0	How cannabis is tested, by whom, against what limits, and what happens when a batch fails.
Agency duties, rulemaking and implementation	86	8	1	What the statute told an agency to do, and whether it was done by regulation or by policy.
Home grow and possession	85	8	0	Personal cultivation and possession limits.
Social equity	65	8	1	The social equity applicant definition, the Council, the ventures and the loan fund.
Hemp and infused beverages	56	7	0	The parallel hemp market and the beverages that straddle it.
Municipal authority	48	7	0	What a town may allow, restrict or tax.
Taxation and revenue	40	8	0	Cannabis taxes and where the revenue goes.
Data, reporting and transparency	33	6	0	What the state is required to publish, and what it actually publishes.
The Cannabis Ombudsman	1	1	0	The office created by P.A. 23-79 and what it can actually do.

9. Claims review and publication readiness

411 claims reviewed, each with its status, its support, its risk and what it still needs.

PUBLICATION READINESS	CLAIMS	WHAT IT MEANS
ready now	262	Every element traces to a tier 1 or tier 2 source and the wording matches what the source supports.
needs one more record	147	The claim is supported but one element rests on inference. The record that would close it is named in section 10.
background only	1	True as far as it goes, but it cannot carry the weight a reader would put on it. Use for context, never as a finding.
kill/avoid	1	Must not be published in any form on this record. Section 11 gives the wording that can be.

The claims that are not ready. The two that are not publishable on this record, in full.

CLAIM	STATUS	WHY	WHAT IS MISSING
Trade association awards and events preceded decisions favourable to award recipients.	open question	Event listings and decision dates, both public and both dated.	Officials' calendars and meeting records, GAP_0012. Sequence is not causation and no causal claim may be published on this record.
Lobbying by cannabis clients caused specific statutory language.	do not say	Registrations establish that clients sought to influence legislation. Nothing in the record links a registration to a drafting decision.	LCO drafting requests and committee working papers, GAP_0003.

A worked example of the standard. The record shows that a trade association's five-point list appears in a subsequent substitute bill, and it shows the dates of both. That is a documented sequence and it is publishable as one. It is not publishable as "the association wrote the bill", because the committee record does not name a requester and the LCO drafting request has not been obtained. The dataset carries the sequence at strength 4 and the causal claim at kill/avoid, and the difference between those two rows is the whole method.

10. Open gaps and the exact record that closes each

12 gaps. Each names the custodian and the specific record, not a general request.

GAP	CUSTODIAN	RECORD REQUESTED	WHY IT MATTERS	PRIORITY
GAP_0001	Connecticut General Assembly	Enacted text of P.A. 23-79 (HB 6699)	The act that added the three twenty-mile rules and created the Ombudsman is the one cannabis act whose enacted text is not held locally. Its sections are recorded from the bill status page and the statutory matrix instead of parsed.	HIGH
GAP_0002	General Law Committee	Committee agendas and meeting minutes, 2021 to 2026	Needed to establish when a provision was taken up and by whom, and to date the point at which language entered a substitute.	HIGH
GAP_0003	Legislative Commissioners' Office	Amendment drafting requests	The bill status pages give LCO numbers but not who requested each amendment. Authorship of language is therefore unknown for most amendments in this dataset.	HIGHEST
GAP_0004	Department of Consumer Protection	Backer disclosure schedules	The eLicense register carries no field linking a backer to the establishment backed, so every cap and affiliate test in the statute is unverifiable from public data.	HIGHEST
GAP_0005	Social Equity Council	Equity joint venture approval packets	These contain the organizing documents CGS 21a-420u(c) requires, naming each backer's ownership stake, initial investment and payout terms. Without them the fifty per cent ownership limb cannot be tested for any venture.	HIGHEST
GAP_0006	Department of Consumer Protection	Any record construing the repealed twenty-mile rules for the period they were in force	Former CGS 21a-420u(f), 21a-420j(e) and 21a-420m(f) were repealed effective 1 January 2026. Whether the Department ever treated them as engaged, and how it measured distance, is not in any published record.	HIGH
GAP_0007	Department of Consumer Protection	A conversion register	No published file states which hybrid retailer licence converted from which dispensary facility licence. Every conversion in the ownership package is reconstructed rather than read, and for twenty active hybrid retailers even reconstruction fails.	HIGH
GAP_0008	Department of Consumer Protection	Lottery AWARDS, as distinct from entries	The published applicant list records entries bought, not awards made. For every company that entered both lotteries the award route is unresolvable.	HIGH
GAP_0009	Department of Consumer Protection	The Policies and Procedures document history for the adult-use market	Adult-use requirements sit in a policy document rather than adopted regulations. The version history and the authority relied on for each change are not published.	HIGHEST
GAP_0010	General Law Committee	Written testimony recorded as NOT RETRIEVED	67 of the 683 testimony records in this dataset could not be retrieved. They are listed, never omitted.	MEDIUM
GAP_0011	Office of State Ethics	Lobbyist communication records beyond registration	Registrations establish that a client sought to influence legislation. They do not say what was asked for, of whom, or when.	MEDIUM
GAP_0012	Department of Consumer Protection; Socia	Officials' calendars and meeting records	The access log records public events. Who met whom privately, and when, is not published.	MEDIUM

Status of all twelve

DRAFTED AND NOT SENT. Nothing in this project has been sent to the Department of Consumer Protection, the Social Equity Council, the General Assembly, the Office of State Ethics, any company, any owner or any reporter.

11. Do-not-say guardrails

Ten claims that must not be published on this record, why, and the wording that can be.

These are published rather than kept internal. A site that shows its own guardrails is making a checkable promise about everything else on it, and it tells a subject of the reporting exactly what is not being said about them.

ID	DO NOT SAY	WHY	SAY THIS INSTEAD
GUARD_001	The twenty-mile rule bars these licences.	The rule was repealed effective 1 January 2026 by P.A. 25-101 sections 15 to 17. It supports no current compliance finding of any kind.	Former CGS 21a-420u(f), repealed effective 1 January 2026, applied between 1 July 2023 and 31 December 2025. As a historical question the record shows [x].
GUARD_002	Company A owns Company B.	No public Connecticut record establishes legal or beneficial ownership of any cannabis establishment. Across 4,702 typed relationships there is not one ownership edge.	Company A is filed as a principal of Company B in the Secretary of the State registry. A principal filing proves the filing, not ownership, a percentage or control.
GUARD_003	A contribution or an award caused a decision.	Contributions, awards and event attendance are lawful, disclosed and ordinary. Sequence is not causation and the record does not support a causal claim.	X contributed \$N on [date]; the decision followed on [date]. No link between the two is established and none is asserted.
GUARD_004	The social equity ventures are fronts.	Neither limb of the statutory test can be checked from outside: no ownership percentage is published and control was not defined until 1 November 2026.	Whether these ventures meet the fifty per cent ownership and control test cannot be determined from any public Connecticut record, in either direction.
GUARD_005	Operator X has N per cent of the Connecticut cannabis market.	Connecticut publishes no sales or revenue by licensee. Any market share figure is unsourceable.	Operator X holds N of the M active retail credentials, which is licence concentration, not market share.
GUARD_006	The lottery was won by X.	The published applicant list records entries bought, not awards made.	X appears in the published lottery applicant list with N entries. The list does not record awards.
GUARD_007	A witness's position is what the committee report says it is.	Joint favorable reports summarize testimony in committee staff's words.	The committee report characterises the testimony as [x]; the witness's own filing says [y].
GUARD_008	The requirement is in the regulations.	Many adult-use requirements sit in an agency policy document, not in regulations adopted under chapter 54.	The requirement appears in the Department's Policies and Procedures, which is not a regulation adopted under chapter 54.
GUARD_009	The bill's sponsor wrote this language.	Bill status records give introducers and LCO numbers, not drafting authorship.	The language first appears in [instrument] on [date]. Who requested it is unknown on this record; the earliest source found is [x].
GUARD_010	This agency failed to adopt required regulations.	Whether a regulation was required, and by when, depends on the enabling section and any later amendment. State the section and the date before the conclusion.	[Section] directed the agency to adopt regulations by [date]. The eRegulations record shows [status] as of [date].

12. The website data model

Twenty-one CSVs, six JSON files and a build brief. Stable IDs throughout.

DATASET	ROWS	ID FORMAT	WHAT IT IS
sources	25	SOURCE_0001	Master citation ledger
legal_changes	399	PA2026_008_SEC059	One row per discrete enacted change
statute_matrix	24	MATRIX_<slug>	Dated provision matrix, rule verbatim
statutes	107	STAT_21A_420U	Statutory map with repeal notes
public_acts	12	PA2026_008	Each enacted act
bills	15	BILL_2024_HB5150	Every bill in scope
bill_lineage	383	BILL_2024_HB5150_A001	Every dated bill action
amendments	209	AMD_2026_LCO7505	Called and uncalled amendments
votes	63	VOTE_2026_HB5350_77	Roll calls
testimony	683	TMY_0001	Speaker, organization, position as filed
people_entities	1,105	PERSON_ / ORG_	Actors and organizations
agencies	15	ORG_<NAME>	Agencies, committees, legislative offices
influence_events	1,035	INFL_0001	Evidence of shaping, rated 0 to 5
regulations_policies	33	REG_0001	Agency implementation record
issues	14	ISSUE_TESTING	Issue pages with counts
timeline_events	616	TL_0001	Everything dated, one stream
glossary	12	(term)	Terms a reader must have
claims_review	411	CLAIM_0001	Publication risk control
gaps_to_foia	12	GAP_0001	Records still needed
do_not_say	10	GUARD_001	Claims to avoid and safer wording
out_of_scope	3	(bill key)	Bills dropped, with the reason

JSON exports for the site. timeline.json, statute_changes.json, influence_graph.json, bill_network.json, issue_pages.json and source_index.json, plus a manifest of row counts the build asserts against. Filter dimensions are baked in: year, actor, agency, bill, issue category, source type, evidence strength and affected group.

Thirteen site pages are specified in NETLIFY_BUILD_BRIEF.md with their data contracts, components, filters, visualizations and the build-time assertions that must fail a deploy — including that no template may render a claim whose status is "do not say", and that the influence graph must exclude strength 0 and 1 from its default view.

A. Appendix A — source appendix, every source in full

Each source with its custodian, type, URL or file, date, citation, tier, and the plain statement of what it cannot show.

URL or file	https://www.cga.ct.gov/
Document date	2026-09-29
Citation	Joint Favorable Reports, General Law Committee, Connecticut General Assembly, 2026-09-29
Reliability tier	2 — committee staff summary
Retrieved	2026-09-29
Local file	/home/claude/ct/runs/S4-TMY-20260920/jfr_cache/
Limits and notes	These are COMMITTEE STAFF SUMMARIES of testimony, not witnesses' words.

SOURCE_0014	Member-by-member roll call sheets
Custodian or issuer	Connecticut General Assembly
Document type	roll call vote
URL or file	https://www.cga.ct.gov/2026/VOTE/
Document date	2026
Citation	Member-by-member roll call sheets, Connecticut General Assembly, 2026
Reliability tier	1 — primary vote record
Retrieved	2026-09-29
Local file	/home/claude/ct/runs/S4-LANG-20260920/S4-LANG-20260920__roll_call_members.csv
Limits and notes	Names as printed on the official sheets.

SOURCE_0015	Office of State Ethics lobbyist filings, client spending and issues
Custodian or issuer	Connecticut Office of State Ethics
Document type	lobbying registration
URL or file	https://www.oseapps.ct.gov/NewLobbyist/PublicReports/AdditionalReports.aspx
Document date	2026-09-19
Citation	Office of State Ethics lobbyist filings, client spending and issues, Connecticut Office of State Ethics, 2026-09-19
Reliability tier	1 — primary filing
Retrieved	2026-09-29
Limits and notes	Retrieved by POSTing the public reports form for each year; reproducible.

SOURCE_0016	Campaign contribution records
Custodian or issuer	Connecticut State Elections Enforcement Commission
Document type	campaign contribution
URL or file	https://seec.ct.gov/
Document date	2026-09
Citation	Campaign contribution records, Connecticut State Elections Enforcement Commission, 2026-09
Reliability tier	1 — primary filing
Retrieved	2026-09-29
Limits and notes	Contributor as filed, employer as filed, recipient committee.

SOURCE_0017	eRegulations rulemaking tracking records
Custodian or issuer	Connecticut Secretary of the State eRegulations System
Document type	regulation record
URL or file	https://eregulations.ct.gov/
Document date	2026-09-15
Citation	eRegulations rulemaking tracking records, Connecticut Secretary of the State eRegulations System, 2026-09-15
Reliability tier	1 — primary filing
Retrieved	2026-09-29
Limits and notes	Proposed, withdrawn and adopted regulations by tracking number.

SOURCE_0018	CT eLicense, State Licenses and Credentials (ngch-56tr)
Custodian or issuer	Department of Consumer Protection / DAS
Document type	open data
URL or file	https://data.ct.gov/Business/State-Licenses-and-Credentials/ngch-56tr
Document date	2026-09-29
Citation	CT eLicense, State Licenses and Credentials (ngch-56tr), Department of Consumer Protection / DAS, 2026-09-29
Reliability tier	1 — primary register
Retrieved	2026-09-29
Limits and notes	Every establishment and person credential. Carries no field linking a backer to the establishment backed.

SOURCE_0019	Cannabis Applications (bqby-dyzt)
Custodian or issuer	Department of Consumer Protection
Document type	open data
URL or file	https://data.ct.gov/d/bqby-dyzt
Document date	2026-09-20
Citation	Cannabis Applications (bqby-dyzt), Department of Consumer Protection, 2026-09-20
Reliability tier	1 — primary register
Retrieved	2026-09-29
Limits and notes	86 published applications, with how each applicant was selected. The only published record of entry route, covering an eighth of the register.

SOURCE_0020	Lottery applicants (y64a-qj22)
Custodian or issuer	Department of Consumer Protection
Document type	open data
URL or file	https://data.ct.gov/d/y64a-qj22
Document date	2026-09-29
Citation	Lottery applicants (y64a-qj22), Department of Consumer Protection, 2026-09-29
Reliability tier	1 — primary register
Retrieved	2026-09-29
Limits and notes	8,458 rows recording ENTRIES bought in each lottery, not awards made.

SOURCE_0021	CT Business Registry: Business Master, Principals and Agents
Custodian or issuer	Connecticut Secretary of the State
Document type	business registry
URL or file	https://data.ct.gov/d/n7gp-d28j
Document date	2026-09-29
Citation	CT Business Registry: Business Master, Principals and Agents, Connecticut Secretary of the State, 2026-09-29
Reliability tier	1 — primary register
Retrieved	2026-09-29
Limits and notes	Principals AS FILED. Not a capitalization table: no percentages, share classes, options, vetoes, management agreements or loans.

SOURCE_0022	Who Owns and Controls Connecticut Cannabis — ownership and control audit
Custodian or issuer	CT Cannabis Record Package
Document type	derived analysis
URL or file	OWNERSHIP_MASTER.xlsx and the complete ownership and control atlas
Document date	2026-09-29
Citation	Who Owns and Controls Connecticut Cannabis — ownership and control audit, CT Cannabis Record Package, 2026-09-29
Reliability tier	2 — derived, fully sourced
Retrieved	2026-09-29
Limits and notes	280 licensed entities, 693 credentials, 133 registry families, 4,702 typed relationships. Zero edges of legal ownership or management and control.

SOURCE_0023	CT Cannabis Evidence Workbook v3
Custodian or issuer	CT Cannabis Record Package
Document type	derived analysis
URL or file	PROJECT/CT_Cannabis_Evidence_Workbook_v3.xlsx
Document date	2026-09-29
Citation	CT Cannabis Evidence Workbook v3, CT Cannabis Record Package, 2026-09-29
Reliability tier	2 — derived, fully sourced
Retrieved	2026-09-29
Local file	/home/claude/ct/PROJECT/CT_Cannabis_Evidence_Workbook_v3.xlsx
Limits and notes	Lobbying, contributions, events and access, decision chronology, lab rule timeline, claim ledger and FOI register.

SOURCE_0024	Language provenance, amendments and floor votes, run S4-LANG-20260920
Custodian or issuer	CT Cannabis Record Package
Document type	derived analysis
URL or file	runs/S4-LANG-20260920/
Document date	2026-09-20
Citation	Language provenance, amendments and floor votes, run S4-LANG-20260920, CT Cannabis Record Package, 2026-09-20
Reliability tier	2 — derived, fully sourced
Retrieved	2026-09-29
Local file	/home/claude/ct/runs/S4-LANG-20260920/
Limits and notes	Where provision language first appeared, and how it moved between bills.

SOURCE_0025	CGS chapters 420f and 420h as published by the General Assembly
Custodian or issuer	Connecticut General Assembly
Document type	published statute compilation
URL or file	https://www.cga.ct.gov/current/pub/chap_420h.htm
Document date	2026-09-29
Citation	CGS chapters 420f and 420h as published by the General Assembly, Connecticut General Assembly, 2026-09-29
Reliability tier	3 — secondary, KNOWN TO LAG
Retrieved	2026-09-29
Limits and notes	DO NOT RELY ON THIS FOR CURRENT LAW. On 29 September 2026 it still printed CGS 21a-420u(f) in full and never mentioned P.A. 25-101, which repealed it effective 1 January 2026.

B. Appendix B — glossary

The terms a reader has to have to read anything else in this dataset.

TERM	DEFINITION
RERACA	The Responsible and Equitable Regulation of Adult-Use Cannabis Act, the body of law created by June Sp. Sess. P.A. 21-1.
public act	A bill that has passed both chambers and been signed or allowed to become law. The enacted act, not the published chapter page, is the authoritative text.
substitute bill	A committee's replacement text for a raised bill. Where language first appears in a substitute, the committee record is the earliest source.
LCO number	The number the Legislative Commissioners' Office assigns to an amendment. A called amendment was voted on; an uncalled amendment was filed and never voted, and is evidence of what was asked for.
file copy	A numbered printing of a bill as reported out. Fiscal notes and bill analyses are written against a file copy, so the file number dates the analysis.
equity joint venture	A company at least fifty per cent owned AND controlled by a person meeting the social equity criteria, sponsored by an existing licensed establishment. Two limbs, not one.
social equity applicant	Defined by income and residency criteria. Connecticut publishes no list of which licensees are social equity licensees.
backer	A person with a direct or indirect financial interest in a cannabis establishment who must register. The register carries no field saying which establishment a backer backs.
hybrid retailer	A converted medical dispensary facility selling to both patients and adult-use customers.
DIA cultivator	A disproportionately impacted area cultivator: a route to a cultivator licence outside the lottery, on payment of a substantial fee.
policies and procedures	An agency document that is NOT a regulation adopted under chapter 54. The distinction decides what survives a challenge.
joint favorable report	The committee's report recommending a bill. Its testimony summary is committee staff's account, not the witness's words.

Reporting checklist for this batch

New verified legal changes added: 399 discrete enacted changes across eight acts, 125 of them carrying the deleted old rule, four of them repeals.

New actors and entities added: 1,105, of which 502 are witnesses who filed testimony, 291 organizations, 136 campaign committees, 148 individuals and 10 registered lobbyists.

New influence events and their evidence strength: 1,035 events — 797 at strength 4, 41 at 3, 197 at 2. None at 5, because a strength 5 requires a direct documentary link between an actor and a drafting or decision act, and no such document is in this record.

Open gaps and the exact record needed: 12, listed in section 10. The three that would change the most are the LCO amendment drafting requests, the Social Equity Council approval packets and the Department's backer disclosure schedules.

Claims that must not be made yet: 1 at kill/avoid and 1 background only, with the publishable wording for each in section 11.

Files created: this report; CT_CANNABIS_LAW_TIMELINE_MASTER.xlsx; twenty-one CSVs under data/; six JSON exports plus a manifest under web/; and NETLIFY_BUILD_BRIEF.md.
